

International Commission for Uniform Methods of Sugar Analysis Ltd (ICUMSA®) and

Verlag Dr. Albert Bartens KG

Copyright, Licensing and Trademark Policy 2020

Foreword

The International Commission for Uniform Methods of Sugar Analysis Ltd. (ICUMSA®), the only international organisation concerned solely with analytical methods for the sugar industry, was founded in 1897 and is thus one of the first international standards organisations like ISO/IEC, CODEX Alimentarius, AOAC and others.

The development and standardisation of analytical methods for sugar industries, their suppliers and their customers are done by voluntary members in more than 20 National Committees worldwide.

ICUMSA® Methods are published as well in printed as in electronic form. While the complete Methods Book is available both as print, time-limited and regularly updated electronic version the individual methods are only offered as time-limited online version. The print version is updated by publication of Supplements regularly. All versions (print and electronic) are copyright protected by the applicable national copyright laws according to international rules.

At the same time, the aim of ICUMSA® is to have their methods used by everybody involved in production, trade, application and quality control of sugar, including raw materials and by products, worldwide.

This document explains, how to use and how to cite ICUMSA® Methods respecting copyright laws and ICUMSA® trademark rights.

1. Intellectual Property (according to WIPO definitions)

Copyright

Copyright (or author's right) is a legal term used to describe the rights that creators have over their literary, more generally written and artistic works. Works covered by copyright range from books of any content, including scientific and technical works, music, paintings, sculpture, and films, to computer programs, databases, advertisements, maps, and technical drawings.

Copyright law aims to balance the interests of those who create content, with the public interest in having the widest possible access to that content.

Trademark

A trademark is a sign capable of distinguishing the goods or services of one enterprise from those of other enterprises. Trademarks are protected by intellectual property rights. The name ICUMSA® is protected in many countries of the world.

2. Citation

"Citation" means telling your readers that certain material in your work came from another source. ICUMSA® Methods should be cited as follows:

Method number (Year of last revision) Title – Status (Official (Reference) or Tentative or Accepted), Verlag Dr. Albert Bartens KG, Berlin, Germany

For example:

ICUMSA® Method GS1-1 (2011) The Determination of the Polarisation of Raw Sugar by Polarimetry – Official, Verlag Dr. Albert Bartens KG, Berlin, Germany

Please note that the ICUMSA® Methods numbering system was revised in 2019

Whenever you borrow words or ideas from ICUMSA® Methods or any other ICUMSA® material, you need to acknowledge their source as per the above indicated citation method.

3. Rights to use ICUMSA® Methods

Unless otherwise specified, as owner and publisher, Verlag Dr. Albert Bartens KG ("Verlag Bartens") holds all rights, including copyright in the ICUMSA® Methods, and maintains these rights under all circumstances. Verlag Bartens reserves the right to withdraw the ICUMSA® Methods in order to comply with any legal rule or court order, or if the publisher is at risk of liability from the continued availability of the ICUMSA® Methods or part of it. Verlag Bartens will use all reasonable efforts to ensure that the ICUMSA® Methods are available to authorized users, and to restore access as soon as possible in the event of an interruption. ICUMSA® Method Books are available both in print and eBook versions. Individual ICUMSA® Methods are also available via online access granted by Verlag Bartens.

Online Access: Users may be granted access to ICUMSA® Methods by obtaining an individual code from Verlag Bartens. Such code can be entered on a website provided by Verlag Bartens. Users may download, save or print the ICUMSA® Methods but may access and use the ICUMSA® Methods solely for private, research or internal business purposes.

The user must immediately notify Verlag Bartens of any known or suspected unauthorized use(s) of the individually granted login details, or any known or suspected breach of security, including the loss, theft or unauthorized disclosure of login details or any unauthorized access to or use of the ICUMSA® Methods to which access is granted. The user is solely responsible for maintaining the confidentiality of the login details and for ensuring the authorized access and use of the ICUMSA® Methods.

Users of the online, eBook and/or printed versions of ICUMSA® Method Books or individual ICUMSA® Methods may not copy, resell, redistribute, publish or re-publish, alter, recompile, or systematically download the content of ICUMSA® Methods or any part thereof without explicit permission from Verlag Bartens.

Verlag Bartens offers some options for extended use of ICUMSA® Methods (Licensing):

- Free access to all users coming from a specific IP number(s), thus making it available on company's intranets.
- Extracting parts of ICUMSA® Methods for inclusion in the company's internal documentation, user's guide or manuals – ICUMSA and Verlag Bartens encourage the use and adoption of their methods in company documentation. Depending on the scale of the extract, permission can be granted on a case-by-case basis.
- Including parts of ICUMSA® Methods in books or software applications – Citing methods or including extracts is encouraged as long as acknowledgements and any necessary royalty arrangements are concluded.

Scientific papers or marketing literature that suggest that a proprietary method or analytical instrument has been approved by ICUMSA® are not permitted and are misleading.

To find out how to obtain any additional rights or if you have any questions relating to copyright, please contact Verlag Bartens or ICUMSA®.

4. ICUMSA® Trademark Rights

The word ICUMSA enjoys protection as a registered trademark in many countries worldwide. The trademark protection of the word ICUMSA prohibits third parties from using the sign in the course of trade for goods and/or services that do not originate from International Commission of Unified Methods of Sugar Analysis Ltd. or Verlag Bartens. Verlag Bartens and the International Commission of Unified Methods of Sugar Analysis Ltd. will not tolerate any infringing use of the ICUMSA® trademark. Using the ICUMSA® trademark in the course of trade requires a prior explicit licence by the International Commission of Unified Methods of Sugar Analysis Ltd. or Verlag Dr. Albert Bartens KG.

In contrast, using the sign ICUMSA® for purely private or scientific purposes, thus, not in the course of trade, will typically not be considered to be infringing. The same applies to use of the word ICUMSA® in purely editorial contexts for press purposes, such as references to ICUMSA® and its Methods in trade journals.

The ICUMSA® trademark is, however, typically infringed when the sign is used by third parties for commercial purposes in relation to their own goods and/or services. In this context, even if such use serves primarily to identify the goods and/or services of the International Commission of Unified Methods of Sugar Analysis Ltd or Verlag Bartens, but ultimately commercially promotes the user's goods and/or services, this will be considered trademark infringement. Therefore, it is not allowed to use the ICUMSA® trademark in commercial material such as promotional booklets, product brochures etc. in relation to the user's own goods and/or services without a prior licence by the International Commission of Unified Methods of Sugar Analysis Ltd. or Verlag Bartens.

Such use may also mislead the relevant public that the respective promotional materials have been elaborated in cooperation with or endorsed by the International Commission of Unified Methods of Sugar Analysis Ltd or Verlag Dr. Bartens KG. This will be considered illegal as unfair marketing practices in many countries, as the International Commission of Unified Methods of Sugar Analysis Ltd has never approved or endorsed any scientific instrument or instrument manufacturer and will not do so in the future.
